Takuya Kitashima, Waves Dancing on the Skin, 2022, Acrylic on canvas. 803 x 602 mm

Esther Okada Art Gallery is pleased to present for the first time Takuya Kitashima with his new series of paintings and sculptures. The exhibition is titled "Waves Dancing on the Skin" and the exhibition is from November 11 to December 5, 2022.

The series is about "the surface" and the artist tries to reconstruct the inside and the outside of the surface. His works are covered by characteristic atmospheres that awake some kind of unquiet feelings in us. These feelings are probably instinctive and we may feel those feelings when we encounter something unordinary in our daily lives. His works that gently let us realize distortions or strangeness in the ordinally world would create a good harmony with our gallery situated in the underground of an ordinary residential area.
